SOLAR PV | BATTERY | AGGREGATED GRID SERVICES

BUILDING VIRTUAL  
POWER PLANTS  
WATT BY WATT

## WHO WE ARE

We continue developing our technology and implementing innovations for better functionality and more energy saving.

Whether you're a homeowner, business, or nonprofit, electricity costs can make up a large portion of your monthly expenses. Even if you don't produce 100% of the energy you consume, solar will reduce your utility bills, saving you a lot of money. With the cost of solar becoming more affordable it now makes more sense than ever to install solar.

## WHAT WE DO

### ROOF MOUNTED SOLAR

Use your roof to generate savings for your business. Most roof types are suitable.

### GROUND MOUNTED SOLAR

Utilise spare ground or car parks to install energy saving solar panels.

### EV CHARGING

Supply charge points for your employees or customers. Charging can be a free or revenue-generating option.

### BATTERY STORAGE

Increase your self-consumption by storing excess solar production in a battery for later use.

### MAINTENANCE

Panel cleaning, cable integrity checking and repairs are all part of our service offering.

### AGGREGATED GRID SERVICES

Become part of a network of autonomous producers that aggregate your facilities and offer them back to the electricity grid.

## WHY YOU SHOULD WORK WITH US

- We are SEAI and RECI Registered since 2015
- We do it ourselves with our inhouse engineers,
- We provide comprehensive Operation and Maintenance Services with our installation,
- We look after our customers after the project is completed.
